NOTICE OF VIOLATION

Company / Operator Performance Coal Company Contractor: Yes ____ No x

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 2-15 20 12 Time 1:20 ____A.M. x P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter ____ Article ____, Section ____ and/or West Virginia Administrative Regulation:. Title 36 , Series 6 , Section 4.1 k exists as follows:

The following condition was discovered during an investigation of an explosion that occurred at Performance Coal Company, Upper Big Branch mine on April 5, 2010. This violation of state code is of a serious nature and involves fatalities. 22A-1-21 (B) (2) (A) The Methane and Dust Control Plan dated August 20, 2019 and approved August 24, 2009 was not being complied with on the 21 Longwall working face on March 1, 2010 on the B Crew evening shift. The maintenance report for this shift shows that the longwall shearer was mining coal with 8 water sprays removed from each cutting drum. This action was recorded stating the water sprays were taken out and left out because the sprays kept plugging up, not working, while the crew was attempting to mine coal. The report goes on to document that the crew operated the machine the remainder of the shift in an attempt to flush or clean the drums water spray system. This action reduces the number of sprays required in the approved plan and also would drastically affect the required water pressure on the shearer.

Type of Issuance: N.O.V. x Order ____

Area or equipment (if order is issued): ____

The foregoing violation shall be totally abated by ____ ____ a. m. 1:30 p.m. on 2-15 20 12

The foregoing violation was totally abated by ____ ____ a. m. 1:30 p.m. on 2-15 20 12

Action taken to abate the violation: Requirement of the law was discussed with mine management.

Company / Operator Agent Served: Larry Brown

Authorized Representative: Barry Fletcher Barry Fletcher Inspector No. 78

REVIEW: In accordance with Section 22A-1 -1 7 of the Code, an operator or any representative of the miners may apply to the Director of the Office of Miners' Health, Safety and Training for review of this notice of violation within thirty (30) days from the issued date.

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 10-19 20 11 Time 9:10 x A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter ____ Article ____, Section ____ and/or West Virginia Administrative Regulation:. Title 36 , Series 6 , Section 4.1 k exists as follows:

The following conditions were discovered during an investigation of an explosion at the Performance Coal, Upper Big Branch Mine which occurred on April 5, 2010. Tests and checks were conducted on the Longwall Shearer water spray system on December 20, 2010 by members of all parties of the investigative teams. These tests clearly showed that the Methane and Dust Control Plan dated August 20, 2009 and approved August 24, 2009 was not being complied with on the day of the explosion. Seven (7) of the tail drums forty five (45) water sprays were missing when examined which leaves less than the 43 required in the plan to be operational.. The sketch provided with the approved plan titled "Performance Coal Company Inc. Upper Big Branch Mine Spray Location Drawing" shows the minimum number of water sprays that must be operating at any one time on the tail drum to be 43 sprays. None of the missing sprays had been removed by any parties of the investigative teams prior to this test. This condition of the missing tail drum sprays existed at the time of the explosion.

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 10-19 ,20 11 Time 9:55 x A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter ____ Article ____, Section ____ and/or West Virginia Administrative Regulation:. Title 36 , Series 6 , Section 4.1 k exists as follows:

The following conditions were discovered during an investigation of an explosion that occurred at Performance Coal, Upper Big Branch mine on April 5, 2010. The Methane and Dust Control Plan dated August 20, 2009 and approved August 24, 2009 was not being complied with on the Longwall 21 MMU No. 050-0 #1 Unit working section. The page of the approved plan titled, "Section Specific Methane Dust Control Plan" states that a minimum operating pressure at the sprays on the shearer to be 90 psi. Tests were conducted on the water pressure at the shearer water sprays on December 20, 2010 by members of all parties of the investigative teams. Due to multiple sprays missing from the tail cutting drum and a spray block broken off the face side near the tail drum zero psi could be obtained at the sprays on the tail drum of the shearer. These tests were conducted with water pressures delivered to the shearer ranging from 50 psi to as high as 450 psi. Inadequate (Zero) pressures were measured on the tail drum with the gauges installed during these tests of the tail cutting drum.

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 2-15 20 12 Time 1:00 ____A.M. x P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 66 (b) (c) and/or West Virginia Administrative Regulation:. Title ____, Series ____, Section ____ exists as follows:

On April 5, 2010 at approximately 3:00 pm an explosion occurred at the Upper Big Branch Montcoal Eagle Mine. West Virginia Code 22A- 2- 66 requires the coal operator to give immediate notice within 15 minutes of ascertaining the occurrence of an accident. Based on evidence, Performance Coal should have determined that an accident as stated in West Virginia Code, 22A-2-66 (a) (5) occurred within moments because significant air forces were felt and seen in the mine near the Ellis portals and these unusually strong forces exiting the mine at Ellis and North portals which are miles apart. Additionally the Carbon Monoxide monitoring system began alarming to the outside and communication with all workers inby 78 break ceased to exist at this time. With all this information and more indicators of something extremely unusual happening Performance Coal did not report the accident until 3:39 pm.

NOTICE OF VIOLATION

Company / Operator PERFORMANCE COAL COMPANY INC Contractor: Yes ___ No X

Permit Number U-4032-92 Mine Name UBB MONTCOAL EAGLE

Date of Issue 10-8-, 20 10 Time 3:02 ___ A.M. X P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A, Article 2, Section 37(a)(d) and/or West Virginia Administrative Regulation: Title ___, Series ___, Section ___ exists as follows: A continuous unobstructed clearance of at least 24 inches from furthest projection of track equipment is not being maintained. Numerous manteips being used to transport men in & out of the mine are loaded & unloaded from both sides of vehicles. Loose rock, coal, plastic pipes of different sizes, old cables, pieces of belt etc. have been allowed to accumulate in the clearance space on the OFF side or right side entering the mine from 55 block inby to 88 block from NORTH PORTAL. The equipment is contacting these materials at several locations.

* This violation has been extended numerous times.
Violation originally cited under 22A-2-37c on 7-29-2010 Violation # 26163

Type of Issuance: N.O.V. ___ Order X FAILURE TO ABATE

Area or equipment (if order is issued): TRACK entry At noted locations

The foregoing violation shall be totally abated by ___ ___ a.m. ___ p.m. on ___ 20 ___

The foregoing violation was totally abated by ___ ___ a.m. ___ p.m. on ___ 20 ___

Action taken to abate the violation: ___

Company / Operator Agent Served: WAYNE PERSINGER

Authorized Representative: Barry Hatcher Inspector No. 78

REVIEW: In accordance with Section 22A-1-17 of the Code, an operator or any representative of the miners may apply to the Director of the Office of Miners' Health, Safety and Training for review of this notice of violation within thirty (30) days from the issued date.

NOTICE OF VIOLATION

Company / Operator Performance Coal Company Contractor: Yes ____ No x

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue June 10 ,20 11 Time 8:00 x A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22 A Article 2, Section 13 and/or West Virginia Administrative Regulation:. Title ____, Series ____, Section ____ exists as follows:

The following conditions were discovered during an investigation of an explosion at the Performance Coal, Upper Big Branch mine which occurred on April 5 2010. There is no record of the working places on the Headgate 23/Tailgate 22 MMU-040-0 Working Section on the Third or Owl shift being inspected every 2 hours as required where miners are working.. Fireboss books clearly show that work was being performed during the shift on the following dates. January 13, 15, 16, 17, 19, 20, 21, 22, 27, 28, 29th 2010. February 5, 6, 8 and 9th 2010. March 4, 5, 9, 11, 16, 17, 19, 23, 26 and 31st 2010. April 1 2020.

Most of these blank or partially filled out pages were countersigned by the mine foreman. Also the midnight foreman working on the shifts noted signed the preshift book for this section prior to going to the section with his men to perform the work. He recorded a roof review in many instances but still did not fill out the onshift record of work performed to correct items he had on his preshft report.

Title ____, Series ____, Section ____ exists as follows:

The following conditions were discovered during an investigation of an explosion at the Performance Coal, Upper Big Branch mine which occurred on April 5 2010. The immediate supervisors of the Headgate 23/ Tailgate 22 MMU 040-0 Working Section did not record as required by law the roof control plan review or the times that they orally reviewed relevant parts of the plan with workers prior to them being engaged in any activity involving the securing of roof or rib during their shift. The required plan review was not recorded on the following dates on the third or Owlshift where workers were involved in securing the mine roof. January 13, 15, 16, 19, 21 and 22nd of 2010. February 6 2010. March 6, 9, 11, 23 and 31st of 2010.

Parts and times of the review were not recorded on the following production dates for the day and evening shifts where work was done to secure the mine roof. January 27 2010. February 5th and 6th of 2010. March 4th and 26th of 2010.

Many entries simply said at "start of shift" as time of review.

Type of Issuance: N.O.V. x Order ____

Area or equipment (if order is issued): ____

The foregoing violation shall be totally abated by ____ ____ a. m. ____ p.m. on ____ 20____

The foregoing violation was totally abated by ____ 10:00 a. m. ____ p.m. on June 10 20 11

Action taken to abate the violation: This article of the law has been discussed with mine management.

Company / Operator Agent Served: Jack Roles

Authorized Representative: Barry Fletcher Inspector No. 78

REVIEW: In accordance with Section 22A-1 -1 7 of the Code, an operator or any representative of the miners may apply to the Director of the Office of Miners' Health, Safety and Training for review of this notice of violation within thirty (30) days from the issued date.

Company / Operator Performance Coal Company Contractor: Yes ____ No x

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue June 10 ,20 11 Time 8:00 x A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22 A Article 2 , Section 25 f and/or West Virginia Administrative Regulation:. Title ____ , Series ____ , Section ____ exists as follows:

.The following conditions were discovered during an investigation of an explosion at the Performance Coal, Upper Big Branch Mine which occurred April 5 2010. The immediate supervisors of the Longwall Section crews did not record the times that they orally reviewed the relevant parts of the roof control plan with workers prior to them being engaged in any activity involving the securing the roof or rib during their shift. This condition was present numerous times from January 1 2010 through April 3 2010. Of the approximately 120 production shifts noted there were only 26 occasions where the times of the review were recorded.

Additionally on at least two occasions the plan review was not entered at all where the records showed that work had been performed (production on the longwall face) to secure the mine roof during the time frame covered by the report recorded. (3-1 on the evening shift and 3-10 2010 on the dayshift.)

NOTICE OF VIOLATION

Company / Operator Performance Coal Company Contractor: Yes ____ No x

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue June 10 ,20 11 Time 8:00 x A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22 A Article 2, Section 16 and/or West Virginia Administrative Regulation:. Title ____, Series ____, Section ____ exists as follows:

.The following conditions were discovered during an investigation of an explosion at the Performance Coal, Upper Big Branch mine which occurred April 5 2010. The Mine Foreman nor others acting on his behalf in that position did not countersign with ink or indelible pencil all reports entered in the record books (preshift & onshift books) of the firebosses for the Portal Section on the following dates. On March 12 2010 the day and second shift records were not signed and the preshift for the Owl shift was not countersigned. On March 29 2010 the evening onshift and the preshift for the Owl shift was not signed.

Additionally on at least five occasions between January 14 2010 and March 14 2010 the preshift records were not properly filled out in that times of the preshift call out were left off, the person who recieved the preshift report was not listed, the signatures were missing. The onshift for the Owl shift on February 19 2010 was also incomplete. These incomplete records were countersigned by the mine foreman.

Type of Issuance: N.O.V. x Order ____

Area or equipment (if order is issued): ____

The foregoing violation shall be totally abated by ____ ____ a. m. ____ p.m. on ____ 20____

The foregoing violation was totally abated by ____ 10:00 a. m. ____ p.m. on June 10 20 11

Action taken to abate the violation: This article of the law has been discussed with mine management.

Company / Operator Agent Served: Jack Roles

Authorized Representative: Barry Fletcher Inspector No. 78

REVIEW: In accordance with Section 22A-1 -1 7 of the Code, an operator or any representative of the miners may apply to the Director of the Office of Miners' Health, Safety and Training for review of this notice of violation within thirty (30) days from the issued date.

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue June 16 ,20 11 Time 7:00 x A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter ____ Article ____, Section ____ and/or West Virginia Administrative Regulation:. Title 36 , Series 26 , Section 4 exists as follows:

The following conditions were discovered during an investigation of an explosion at the Performance Coal, Upper Big Branch mine which occurred April 5 2010. An on-shift examination was not recorded between the third and fifth hours while persons were working in the construction work area called "7 North Construction". In January the following dates show a preshift for the dayshift but no on-shift of the construction work area as required by law. The books show work was performed at this site on the following dates. January 26, 27, 28, 29, and 30th 2010. (all dayshift entries) The same is evident in February on the following dates on the dayshift. February 3, 4, 5, 6, 8, 9, 10, 12, 13, 14, 15, 16, 17, and 18th 2010. In February records show that work was performed and an onshift was not recorded on the second shift on the following dates: 4th, 6th and 11th 2010.The last onshift record was on February 18th 2010 on the dayshift. The books showed a preshift exam for this area on a regular basis until April 5 2010.

Title 22A , Series 2 , Section 25f exists as follows:

The following conditions were discovered during an investigation of an explosion at the Performance Coal, Upper Big Branch mine which occurred April 5 2010. The immediate supervisors of the 7 North Construction Area did not record the review of relevant parts of the approved roof control plan prior to workers performing work to secure the mine roof on the 7 North Construction area.. The fireboss records from January 26 through February 9 2010 clearly show workers had been involved in securing the mine roof in this area on the following dates. A review is not recorded for the dayshift on January 26, 27, 28, 29& 30th 2010. No review recorded on February 6, 12, 13 & 14th 2010. (all dayshift)

Additionally the parts or times of the review were not recorded on February 2nd, 3, 5, 6, 8, and 9th 2010.

The work at this construction site in the initial stages often involved mining and securing roof and ribs to facilitate the installation of a belt line.

Permit Number U-3042-92 Mine Name Upper Big Branch Montcoal Eagle

Date of Issue 10-19 20 11 Time 9:05 X A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter ____ Article ____, Section ____ and/or West Virginia Administrative Regulation:. Title 36, Series 6, Section 4.1 k exists as follows:

The following conditions were discovered during an investigation of an explosion at the Performance Coal, Upper Big Branch mine which occurred on April 5, 2010. The Methane and Dust Control Plan dated August 20 2009 and approved August 24 2009 was not being complied with on the Longwall 21 "MMU N0. 050-0" Unit # 1 working section. The number 8 statement of this approved plan clearly says that during cutting operations no person shall be inby or downwind of the shearer carriage when cutting. The only exceptions is for supervisors or electrical/mechanical personal. Both exceptions are limited by this approved plan. During the course of the investigation testimony revealed that workers regularly worked downwind of the shearer while it was mining coal on the longwall face in capacities other than that of electrical /mechanical or in a supervisory role. This practice exposed workers to unnecessary amounts of dust produced by the mining process on the Longwall face.

Type of Issuance: N.O.V. x Order ____

Area or equipment (if order is issued): ____

The foregoing violation shall be totally abated by ____ ____ a. m. ____ p.m. on ____ 20____

The foregoing violation was totally abated by 10:00 X a.m ____ p.m. on 10-19 20 11

Action taken to abate the violation: Requirements of the approved plan was discussed with Jack Roles, mine superintendent.

Company / Operator Agent Served: Jack Roles

Authorized Representative: Barry Fletcher Barry J Fletcher Inspector No. 78

REVIEW: In accordance with Section 22A-1 -1 7 of the Code, an operator or any representative of the miners may apply to the Director of the Office of Miners' Health, Safety and Training for review of this notice of violation within thirty (30) days from the issued date.

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 10-19 20 11 Time 9:10 x A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter ____ Article ____, Section ____ and/or West Virginia Administrative Regulation:. Title 36 , Series 6 , Section 4.1 k exists as follows:

The following conditions were discovered during an investigation of an explosion at the Performance Coal, Upper Big Branch Mine which occurred on April 5, 2010. Tests and checks were conducted on the Longwall Shearer water spray system on December 20, 2010 by members of all parties of the investigative teams. These tests clearly showed that the Methane and Dust Control Plan dated August 20, 2009 and approved August 24, 2009 was not being complied with on the day of the explosion. Seven (7) of the tail drums forty five (45) water sprays were missing when examined which leaves less than the 43 required in the plan to be operational.. The sketch provided with the approved plan titled "Performance Coal Company Inc. Upper Big Branch Mine Spray Location Drawing" shows the minimum number of water sprays that must be operating at any one time on the tail drum to be 43 sprays. None of the missing sprays had been removed by any parties of the investigative teams prior to this test. This condition of the missing tail drum sprays existed at the time of the explosion.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 36 Article 14, Section 5.1 and/or West Virginia Administrative Regulation:. Title ____, Series ____, Section ____ exists as follows:

The following condition was discovered during an investigation of an explosion at the Performance Coal, Upper Big Branch Mine which occurred on April 5, 2010. An accurate and up to date record book referred to as a "Hot Spot Book" which is required to be kept noting examinations of the areas where cutting and welding has been completed underground is not provided. The only record provided is dated April 9, 2008 through January 28, 2010. Multiple witnesses testified that cutting and welding was done on the longwall face conveyor chain bolts and the head side cowl of the shearer on 4-5-2010 on the midnight or owl maintenance shift.

Additionally the only required record book provided to track all oxygen and gas (acetylene) tanks taken into the mine had not had an entry since January 14 2010. This record is to keep track of all tanks taken into the mine and the dates recorded when tanks are removed from the mine. 22A-2-46 (a)

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22 A Article 2, Section 20 and/or West Virginia Administrative Regulation:. Title ____ , Series ____, Section ____ exists as follows:

During the course of an investigation of the explosion at the Performance Coal, Upper Big Branch mine which occurred on April 5 2010 the following condition was found. The preshift examiner assigned to preshift the 21 Longwall section on April 4, 2010 for the midnight or owl shift crew that was to start work on the fourth and complete its shift on the morning of the fifth of April did not examine the longwall face. The preshift examiner stated in sworn testimony that he did not travel down the face or area commonly referred to as the "jack line" as part of his preshift examination but stopped at the headgate shields. The longwall face is a required part of the preshifters duties while examining the longwall section. This action resulted in the mine not being entirely preshifted prior to workers entering the mine on the midnight or owl shift beginning on April 4, 2010 and ending on the morning of April 5, 2010.

Title 36, Series 18, Section 4. 1 exists as follows:

During the course of an investigation of the explosion at the Performance Coal, Upper Big Branch mine which occurred on April 5 2010 the following condition was found. Witnesses testified that on the Barrier Section on Saturday, February, 13 2010, on the day and evening shifts the Joy 14 CM continuous miner was mining roof rock in the # 4 entry with the methane monitor bypassed in a way that it could not detect methane if encountered. The monitor was intentionally bridged out or bypassed on the day shift Saturday before noon due to a malfunction. Instead of repairing the methane monitor problem when detected, the system was bypassed and the day shift continued mining the belt trench the rest of the shift. Testimony also stated that the second shift on the thirteenth also mined the roof rock with the monitor bridged out. A belt trench and overcast were mined with the methane monitor bridged out or bypassed to render it nonfunctional.

Title 36 , Series 6 , Section 4.1 k exists as follows:

During the course of an investigation of the explosion at the Performance Coal, Upper Big Branch mine which occurred on April 5, 2010 the following conditions were found. The approved Methane and Dust Control Plan dated 8-20-2009 and approved 8-24-2009 for the MMU No.050-0, 21 Longwall Section was not being complied with in that the MP-B (measuring points) air readings for specifically noted locations in the 21 tailgate entries were not being defined with the measurable amount of the air as required in the aforementioned methane and dust control plan. This would include measurements of air entering the bleeder system at the measuring point locations specified in the approved Methane and Dust Control plan to determine the effectiveness of the bleeder system There were no measurements or air readings recorded in the fireboss books at the longwall MP-B locations from March 17, 2010 until the day of the explosion April 5, 2010. The only information noted concerning the MP-B monitoring points in the preshift and onshift books was a repeated notation of the statement "air to gob" or "movement to gob". Testimony confirms that the longwall section foremen did not go into these tailgate entries on a daily basis.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter ____ Article ____, Section ____ and/or West Virginia Administrative Regulation:. Title 56 , Series 4 , Section 5.1 exists as follows:

The following conditions were discovered during an investigation of an explosion at the Performance Coal, Upper Big Branch Mine which occurred on April 5 2010. The operator failed to provide additional storage caches containing a number of additional SCSR's equal to or exceeding one each for the total number of miners reasonably likely to be in the bleeder area adjacent to and behind the 21 longwall panel at 30 minute intervals. Three people regularly worked on pumping water behind the active longwall gobline. On April 5, 2010 three people traveled into the 21 Tailgate entries, from approximately # 29 break inby and behind the longwall to pump water. The foreman traveled as far as the Bandytown fan. This is a distance of approximately 13,000 feet. The operators approved cache plan specifies that caches are to be provided every 4200 feet in areas such as the above mentioned locations. Persons worked in the bleeder area behind or west of the active 21 longwall section on many other occasions.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter ____ Article ____, Section ____ and/or West Virginia Administrative Regulation:. Title 22A , Series 2 , Section 43 (b) exists as follows:

The following condition was discovered during an investigation of an explosion at the Performance Coal, Upper Big Branch Mine which occurred on April 5, 2010. According to testimony, a non-permissible battery powered A. L. Lee Forklift was used on a regular basis in the active 22 Headgate section return. This non-permissible forklift was used to shuttle supplies from the track supply cars and the outby supply holes near the mouth of 22 Headgate section into the 22 Headgate section return. There was a double set of airlock doors located between the track and the 22 section return that could facilitate this practice at the location where this particular forklift was found post explosion, two crosscuts inby the nearest overcast on the 22 Headgate track entry. A record from the director that granted permission to operate a non-permissible, battery powered forklift in the 22 Headgate section return was not provided.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 17 and/or West Virginia Administrative Regulation:. Title ____, Series ____, Section ____ exists as follows:

The following conditions were discovered during an investigation of an explosion that occurred at Performance Coal, Upper Big Branch mine on April 5, 2010. The examinations that were recorded in a book required of the examiner for areas in the active 21 longwall tailgate and bleeders was not filled out in an accurate manner. Hazards were noted by the fireboss on his regular exams in these areas but were not corrected when found nor were they dangered off to keep individuals from coming into contact with noted hazards. These hazards were recorded as follows: (1). The travelway at # 85 to # 86 break has a small roof fall and two loose bolts, recorded on March 18, 2010. (2). The travelway at # 82 break has one broke bolt, recorded on April 1, 2010. (3). The travelway at # 93 break behind the longwall needs jacks set, recorded March 11 2010. These record books noted above were countersigned by the Mine Foreman.

NOTICE OF VIOLATION

Company / Operator Performance Coal Company Contractor: Yes ____ No x

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 10-19 ,20 11 Time 9:50 x A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 68 and/or West Virginia Administrative Regulation:. Title ____, Series ____, Section ____ exists as follows:

The following condition was discovered during an investigation of an explosion that occurred at Performance Coal, Upper Big Branch mine on April 5, 2010. Hand written notes of two different individuals located at the Upper Big Branch North Portal on April 5, 2010 were requested from the company as part of the investigation but have not been received as of October 19, 2011. The purchasing clerk and the dispatcher both stated in testimony that notes they had taken during the April 5, 2010 events documenting information regarding various activities during the onset of the explosion on April 5 2010 were left at the UBB Montcoal portal when they left the mine following their shift. These missing notes are a violation of the control order # 32135 issued the day of the explosion.

Type of Issuance: N.O.V. x Order ____

Area or equipment (if order is issued): ____

The foregoing violation shall be totally abated by ____ ____ a. m. ____ p.m. on ____ 20____

The foregoing violation was totally abated by ____ 10:00 a. m. ____ p.m. on 10-19 20 11

Action taken to abate the violation: The law addressing the specifics of a "Control Order" was reviewed with Jack Roles, mine superintendent.

Company / Operator Agent Served: Jack Roles

Authorized Representative: Barry Fletcher Barry J Fletcher Inspector No. 78

REVIEW: In accordance with Section 22A-1 -1 7 of the Code, an operator or any representative of the miners may apply to the Director of the Office of Miners' Health, Safety and Training for review of this notice of violation within thirty (30) days from the issued date.

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 10-19 20 11 Time 9:55 x A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter ____ Article ____, Section ____ and/or West Virginia Administrative Regulation:. Title 36 , Series 6 , Section 4.1 k exists as follows:

The following conditions were discovered during an investigation of an explosion that occurred at Performance Coal, Upper Big Branch mine on April 5, 2010. The Methane and Dust Control Plan dated August 20, 2009 and approved August 24, 2009 was not being complied with on the Longwall 21 MMU No. 050-0 #1 Unit working section. The page of the approved plan titled, "Section Specific Methane Dust Control Plan" states that a minimum operating pressure at the sprays on the shearer to be 90 psi. Tests were conducted on the water pressure at the shearer water sprays on December 20, 2010 by members of all parties of the investigative teams. Due to multiple sprays missing from the tail cutting drum and a spray block broken off the face side near the tail drum zero psi could be obtained at the sprays on the tail drum of the shearer. These tests were conducted with water pressures delivered to the shearer ranging from 50 psi to as high as 450 psi. Inadequate (Zero) pressures were measured on the tail drum with the gauges installed during these tests of the tail cutting drum.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2 , Section 39 (f) (2) and/or West Virginia Administrative Regulation:. Title ____ , Series ____, Section ____ exists as follows:

The following condition was discovered during an investigation of an explosion that occurred at Performance Coal, Upper Big Branch mine on April 5, 2010. Work was performed in the 21 Longwall conveyor belt entry on the midnight or "Owl" shift on April 5, 2010 prior to the belt entry being examined for hazards.. The rock dust crew, under oath, stated that they had made several trips onto the longwall section to spread rock dust in the longwall belt entry with the track mounted pod duster. This activity was after an idle shift. According to records provided the belt entry had not been on-shifted or pre-shifted prior to the rock dust crew working in the conveyor belt entry that shift. The belt and belt entry was not examined until later in the shift when the preshift exam for the day shift was conducted. Workers had been working in the conveyor belt entry spreading rock dust with the pod duster prior to this exam.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 25a and/or West Virginia Administrative Regulation:. Title ____, Series ____, Section ____ exists as follows:

The following condition was discovered during an investigation of an explosion that occurred at Performance Coal Company, Upper Big Branch mine on April 5, 2010. The operator failed to comply with the approved roof control plan in the tailgate entry of the active 21 Longwall panel in that the required roof support noted on page 19, diagram number 9 showing supplemental support was not being installed as the # 9 diagram clearly illustrates. The approved plan on page 19 clearly shows a double row of post or cable bolts between each row of initial permanent support in the tailgate entry. This supplemental support was to be maintained 1000 feet outby the longwall face in the tailgate entry. There was only one row of post installed in this tailgate entry and cable bolts were not installed as described in the approved plan.

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 2-15 ,20 12 Time 1:05 ____A.M. x P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2 , Section 24 (a) and/or West Virginia Administrative Regulation:. Title ____ , Series ____, Section ____ exists as follows:

The following condition was discovered during an investigation of an explosion that occurred at Performance Coal, Upper Big Branch mine on April 5, 2010. The law states that in all mines dangerous accumulations of fine, dry coal and coal dust shall be removed from the mine, and all dry and dusty operating sections and haulageways, conveyors and back entries, shall be rock dusted or dust allayed by such other means as may be approved by the Director. Mine management has failed to comply with this requirement of the law in that on April 5, 2010 an ignition occurred in the vicinity of the longwall face and this ignition spread into outby entries of the tailgate 21 area of the mine and propagated into a full blown coal dust explosion traveling large distances into the active workings of the mine claiming the lives of 29 men. The explosion throughout this area was fueled by coal dust and coal float dust that was not removed from the mine or rock dusted to a level that would prevent the propagation of an explosion. This is a violation of a safety statue and is of a serious nature involving fatalities.

Type of Issuance: N.O.V. x Order ____

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 2-15 ,20 12 Time 1:10 ____A.M. x P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 24 (a) (c) and/or West Virginia Administrative Regulation:. Title ____ , Series ____, Section ____ exists as follows:

The following condition was discovered during an investigation of an explosion that occurred at Performance Coal Company, Upper Big Branch mine on April 5, 2010. This violation which violates state code is of a serious nature and involves fatalities. 22A-1-21 (b) (2) (A) The law states that in all mines dangerous accumulations of fine dry coal and coal dust shall be removed from the mine, and all dry and dusty operating sections, haulageways, conveyors and back entries shall be rock dusted or dust allayed by such other means as may be approved by the Director. It also states that rock dust shall be maintained in all these areas. Mine management has failed to comply with this requirement of the law in that on April 5, 2010 a methane ignition occurred in the vicinity of the longwall face at this mine. Many factors contributed to the ignition becoming a full blown coal dust explosion. Testimony stated that rock dusting had not been conducted in the 21 Tailgate entries by the track mounted machine duster nor were there any records or testimony stating these entries had been dusted by hand or machine since the longwall began production months earlier. (page one of two, see continuation page attached)

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of, Issue 2-15 f20 ___ Time 1:10 ___A.M. x P.M.

(page two of two) The two most southern entries were the return airways for the miner sections which extended into the tailgate towards the Bandytown fan.. The number seven entry or the northern most entry was the entry that was to be supplying fresh air to the tailgate of the longwall. The additional entries were neutral or intake air until the longwall would retreat and then they would be part of the longwall bleeder system ventilated toward the Bandytown fan. Additionally the number seven entry had experienced an air reversal weeks before the explosion which existed for an undetermined number of days which permitted the longwall face return air to flow in an outby direction allowing that entry to be contaminated with coal float dust from the active longwall. Another factor which contributed to the fuel for the explosion was excessive rib spalling which was visible in the entries in the vicinity of the longwall tailgate as well as other areas of the mine. These spalled entries and crosscuts were additional areas that had not been rock dusted in most locations once initial development had been completed and production on the longwall had begun. This is a violation of a serious nature involving fatalities.

NOTICE OF VIOLATION

Company / Operator Performance Coal Company Contractor: Yes ____ No x

Permit Number U-3042-92 Mine Name Upper Big Branch Montcoal Eagle

Date of Issue 2-15 ,20 12 Time 1:15 ____A.M. x P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2 , Section 4 (a) and/or West Virginia Administrative Regulation:.

Title ____ , Series ____ , Section ____ exists as follows:

This violation of the state code is of a serious nature and involves fatalities. 22A-1-21 (b) (2) (A)-- Adequate ventilation was not provided for the 21 Longwall section. The law requires the mine ventilation under any circumstance to have a sufficient volume and velocity of air to reduce and carry away any flammable or harmful gases. This requirement was not being complied with at the time of the explosion. Methane gas was allowed to accumulate on or near the longwall face, in the gob or the 21 Tailgate entries near the longwall tail. The accumulation was ignited and then became a coal dust explosion resulting in multiple fatalities.

coupled to a flat car was parked between the doors. (6) A regulator between No. 1 and No. 2 entry at Spad No. 22151 is found covered with mine curtain. Based on testimony, on April 5, 2010, during Phase II operation, a continuous miner was cutting the mine roof at Spad No. 22151 to create an overcast, with the above said ventilation controls missing. The dust from the continuous miner was allowed to short circuit over and into the track entry, which is also designated as the secondary escapeway, therefore creating a health danger of silica rockdust in the mine track atmosphere, also poor visibility to all persons in this area. The missing ventilation controls reflect a serious and willfull neglect to the approved ventilation plan, and for the health and safety of all miners at this mine.

Also note: An installed set of opened air lock doors (found damages) is present in the No. 1 entry of the Ellis Mains, between Spad No. 22247 and Spad No. 22275. This entry is provided under Phase II of the approved revision, as the only return air course from the Lower Big Branch construction area to the out side Ellis portal.

NOTICE OF VIOLATION

Company / Operator Performance Coal Co., INC. Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name UBB

Date of Issue 5-21 ,20 10 Time 10:00 X A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 40 (20) and/or West Virginia Administrative Regulation:. Title ____ , Series ____ , Section ____ exists as follows:

The take-up de-watering pump, located underground at the East Mains Punch Out, is not being properly maintained. This pump receives power from a 480 volt distribution box located on the surface at the East Mains Punch Out Portal. This pump was locked and tagged out of service but was wired in such a manner that it connected the surface utility ground to the pump ground even with the cable coupler uncoupled. The ground lug inside the metallic coupler was connected to the frame of the coupler. The frame of the coupler was connected, through an external ground strap, to the metallic frame of the distribution box which was grounded to the surface utility ground. This condition, which was observed at 1:15 pm on 5-20-2010, did not separate the surface utility ground from the underground equipment ground. This pump circuit was not provided with a lightning arrestor as required by Chapter 22A, Article 2, Section 40 (30) of the West Virginia Code.

Type of Issuance: N.O.V. X Order ____

Area or equipment (if order is issued): ____

The foregoing violation shall be totally abated by 8 X a. m. ____ p.m. on 5-24 2010

The foregoing violation was totally abated by ____ ____a.m. ____ p.m. on ____ 20 ____

Company / Operator Performance Coal Co., INC Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name Upper Big Branch

Date of Issue April, 27 ,20 11 Time 11 X A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 40 (15) and/or West Virginia Administrative Regulation:. Title ____, Series ____, Section ____ exists as follows:

The Simmons-Rand 630 Shield Hauler, serial # 1012, located on the long wall section, is not being maintained in a permissible condition due to the following: 1. One flat washer is missing from the deck mounted control station panel lid.

2. The main panel and the breaker panel both have one bolt that is too short for the panel lid.

3. The battery-end deck-side headlight has two lock washers missing from the cover bolts.

4. The battery-end off-side headlight has one bolt missing from the lens guard.

5. The deck mounted speed indicator housing has one allen bolt installed that does not fit the housing lens cover.

6. The power cable and conduit are partially pulled out of the cable entrance gland on the rear traction motor.

7. Both of the safety interlock switches, located in the main panel, are taped closed. These switches de-energize the main circuit breaker when the panel lids are removed. These conditions were observed at 12:40 PM on August 18th 2010.

NOTICE OF VIOLATION

Company / Operator Performance Coal Co., INC. Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name Upper Big Branch

Date of Issue April 27, ,20 11 Time 11 X A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 40 (15) and/or West Virginia Administrative Regulation:. Title ____, Series ____, Section ____ exists as follows:

During an ongoing investigation of an accident that occurred on April 5th 2010, the control boxes on the Head-gate of the Longwall section were not being maintained in a permissible condition due to the following:

1. The 4160 volt shearer cable was not properly entered in the output side packing gland on the shear disconnect box. The inter packing ring was not installed which allowed the packing material to enter the disconnect box.

2. The 110 volt lighting cable, connected to the shearer and tail motor disconnect boxes, was not properly entered in the packing glands on either box. The diameter of the cable was too large to enter the packing glands and the outer jacket had been shaved down to allow the cable to enter.

3. The snap ring was not properly installed on the B-66 plug on the power supply for the shield computer. This condition allows the plug to be energized without being properly secured to the receptacle.

Company / Operator Performance Coal Co., INC. Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name Upper Big Branch

Date of, Issue April 27, 20 10 Time 11 X A.M. ____ P.M.

4. The spare entrance gland, labeled as the Mid-face #2 Readout and located in the #1 bay of the Head-gate control box, is not properly plugged or sealed. The packing gland is plugged with a short piece of 7 conductor cable.

5. The 480 volt cable coupler, labeled as the Head-face pump, is a non-permissible cable coupler. The Head-gate control box that this cable plugs into is located within 150 feet of the face area of the long-wall section.

6. The diameter of the 110 volt lighting power supply cable is too large to enter the packing gland on the B-66 permissible plug which connects to the Head-gate control box. The outer jacket of the cable has been cut down to allow the cable to enter the plug.

7. The entrance gland for the 110 volt lighting cable, in the tail motor disconnect box, has the packing nut tightened down to less than 1/8 inch.

These conditions were observed on August 4th, 2010.

Violation No. 20

No. 26368

NOTICE OF VIOLATION

Company / Operator Performance Coal Co., INC. Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name Upper Big Branch

Date of Issue April 27, 20 11 Time 11 X A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 40 (25) and/or West Virginia Administrative Regulation:. Title ____, Series ____, Section ____ exists as follows:

During an ongoing investigation of an accident that occurred on April 5th 2010, the 110 volt lighting cable, located on the face of the Longwall section, was not provided with adequate insulation. A damaged place in the cable, located between the # 38 and #39 shields, was not adequately insulated. The insulated power conductors are exposed.

.This condition was observed at 3:10 PM on August 5th, 2010.

Type of Issuance: N.O.V. X Order ____

Area or equipment (if order is issued): ____

The foregoing violation shall be totally abated by ____ ____ a. m. ____ p.m. on ____ 20____

The foregoing violation was totally abated by ____ ____ ____ p.m. on ____ 20____

Action taken to abate the violation: This equipment is out of service. Repairs must be completed and the WVOMHS&T notified prior to placing this equipment back in service.

Company / Operator Agent Served: Paul Thompson

Authorized Representative: John P. Scott Inspector No. 129

REVIEW: In accordance with Section 22A-1 -1 7 of the Code, an operator or any representative of the miners may apply to the Director of the Office of Miners' Health, Safety and Training for review of this notice of violation within thirty (30) days from the issued date.

NOTICE OF VIOLATION

Company / Operator Performance Coal Co., INC. Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name Upper Big Branch

Date of Issue April 27, 20 11 Time 11 X A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 40 (15) and/or West Virginia Administrative Regulation:. Title ____, Series ____, Section ____ exists as follows:

During an ongoing investigation of an accident that occurred on April 5th, 2010 it was found that the 35C-XL2 Fairchild Scoop, serial # T339-396, and located on the 22 Headgate Section, is not being maintained in a permissible condition due to the following:

1. The conduit on the right side battery cable packing gland does not have a clamp to secure the conduit.
2. One flat washer is missing from the circuit breaker panel lid.
3. The outer jacket has been cut down to allow the cable to enter the off-side battery plug.
4. The off-side battery cable measures 48 inches in length and 36 inches in length is the maximum that is approved.

These conditions were observed at 10 AM on November 9, 2010

Type of Issuance: N.O.V. X Order ____

Area or equipment (if order is issued): ____

The foregoing violation shall be totally abated by ____ ____ a. m. ____ p.m. on ____ 20____

The foregoing violation was totally abated by ____ ____ ____ p.m. on ____ 20____

Action taken to abate the violation: This equipment is out of service. Repairs must be completed and the WVOMHS&T notified prior to placing this equipment back in service..

Company / Operator Agent Served: Paul Thompson

Authorized Representative: John P. Scott John P. Scott Inspector No. 129

REVIEW: In accordance with Section 22A-1-17 of the Code, an operator or any representative of the miners may apply to the Director of the Office of Miners' Health, Safety and Training for review of this notice of violation within thirty (30) days from the issued date.

Permit Number U-3042-92 Mine Name Upper Big Branch

Date of Issue 10-19 ,20 11 Time 9:30 X. A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 40 (20) and/or West Virginia Administrative Regulation:. Title ____ , Series ____ , Section ____ exists as follows:

During an ongoing investigation of an accident that occurred on April 5 2010, the Emergency Stop Button, for the 480 volt AC power to the Headgate control box, was not properly maintained. The pilot wire for the incoming 480 volt AC power was connected to a diode that was connected directly to ground. This wiring method by-passed the connection to the Emergency Stop Button, making it inoperative for the 480 volt AC circuit.

.This condition was observed at 1:45 PM on July 8 2010.

NOTICE OF VIOLATION

Company / Operator Performance Coal Co. Inc Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 5/14 20 10 Time 12:00 ____A.M. X P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 40(56) and/or West Virginia Administrative Regulation:. Title ____, Series ____, Section ____ exists as follows: Adequate Overload protection is not provided for the 4/0 AWG 15kv mine power cable in use to supply power to the underground 12470 volt circuit identified as the "Glory Belts". The protection for this circuit is provided by a GE Multilin relay that is calibrated to detect an overcurrent condition at 480 amps. The maximum allowable setting for this cable when used on the surface is 466 amps. The cable is derated as follows 384 X.93= 357 X1.25= 466 max. This is the rating for the 30C ambient. The rating for the 20C ambient underground would be 384 X 1.25 = 480 maximum

Type of Issuance: N.O.V. X Order ____

Area or equipment (if order is issued): ____

The foregoing violation shall be totally abated by ____ a. m. ____ p.m. on ____ 20____

The foregoing violation was totally abated by 1:00 a. m. X p.m. on 5/14 20 10

Action taken to abate the violation: Multilin Relay reajusted to pickup at 420 amps

Company / Operator Agent Served: Paul Thompson

Authorized Representative: Kendall R Smith Inspector No. 141

REVIEW: In accordance with Section 22A-1 -17 of the Code, an operator or any representative of the miners may apply to the Director of the Office of Miners' Health, Safety and Training for review of this notice of violation within thirty (30) days from the issued date.

NOTICE OF VIOLATION

Company / Operator Performance Coal Co. Inc Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 5/19 20 10 Time 10:30 X A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 40(20) and/or West Virginia Administrative Regulation:. Title ____, Series ____, Section ____ exists as follows: The DBT Scoop Battery Charger used on the surface of this mine, serial # 0503-3878 is not properly maintained. This charger was missing 5 of the 6 lid bolts. Also the emergency stop switch located on the front panel has been disconnected.

Type of Issuance: N.O.V. X Order ____

Area or equipment (if order is issued): ____

The foregoing violation shall be totally abated by ____ ____ a. m. ____ p.m. on ____ 20____

The foregoing violation was totally abated by 5:30 ____ a. m. X p.m. on 5/19 20 10

Action taken to abate the violation: Lid bolts replaced - Emergency stop switch replaced

Company / Operator Agent Served: Paul Thompson

Authorized Representative: Randall K Spurlock Inspector No. 141

REVIEW: In accordance with Section 22A-1 -1 7 of the Code, an operator or any representative of the miners may apply to the Director of the Office of Miners' Health, Safety and Training for review of this notice of violation within thirty (30) days from the issued date.

NOTICE OF VIOLATION

Company / Operator Performance Coal Co. Inc Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 6/15 ,20 10 Time 9:15 X A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2 , Section 40(25) and/or West Virginia Administrative Regulation:. Title ____ , Series ____ , Section ____ exists as follows: The Brookville track mounted mantrip number MT-6 serial number 8210 in use at this mine is not properly maintained. The power wires and cables used for the back and front headlights are not fully protected. The conduit and fittings as well as other attached devices are damaged and are in need of repair or replacement. Also reflectors were provided on both ends of the mantrip and are missing.

This mantrip was in use at the time of the explosion that occurred on April 5, 2010.

Type of Issuance: N.O.V. X Order ____

The shunt straps (3) and metallic bands (3) were not installed on the cables metallic ribbon shield as required by the manufactures instruction sheet. This power center/belt starter box is provided with only 1 input cable. Additionally this power center/belt starter box has excessive accumulations of grayish rock dust and coal dust located inside the box and on components such as the transformers, circuit breakers, buss bars, etc. This dust may be combustible and/or cause malfunctions with the electrical components. The dust accumulations are approximately 1/16th to 1/8th inch in depth, enough to cover identification tags on the internal electrical equipment.

NOTICE OF VIOLATION

Company / Operator Performance Coal Co. Inc Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 7/14 20 10 Time 9:30 X A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 43(b) and/or West Virginia Administrative Regulation:. Title ____, Series ____, Section ____ exists as follows: The thirty H.P. permissible Flygt dewatering pump located at the # 77 crosscut in the Mains return is not maintained in permissible condition. The pump is not installed as approved, in that the approved explosion proof control box has been replaced with a generic nonpermissible control box. Additionally the approved cable provided between the pump and the control box has been spliced with a type GG-C cable that is also not approved for this installation. The approved permit issued by the Office of Miners' Health, Safety and Training requires all pumps in return air to be permissible and maintained in permissible condition.

§22A-2-43. Electric equipment in mines. (b) Return air. -- In all mines, electric haulage locomotives operated from trolley wire and other electrical equipment or devices which may ignite gas shall not be used in return air, unless permission is granted by the director for a specified area. For the purpose of this provision, air used to ventilate a section of a mine shall not be considered return air until such time as the air has ventilated all of the workings in the section.

NOTICE OF VIOLATION

Company / Operator Performance Coal Co. Inc Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 7/26 20 10 Time 11:00 X A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 43(b) and/or West Virginia Administrative Regulation:. Title ____, Series ____, Section ____ exists as follows: The Stancor P40 6.4 h.p. dewater pump located at the # 13 crosscut in the Mains return is not maintained in permissible condition. This pump is installed with a non approved control box. This pump must be provided with the approved x/p controller to remain permissible. This pump must be maintained permissible in order to comply with the permit approved by W.V.O.M.H.S.T.

Type of Issuance: N.O.V. X Order ____

Area or equipment (if order is issued): ____

The foregoing violation shall be totally abated by 1:00 ____ a. m. X p.m. on 7/27 20 10

The foregoing violation was totally abated by ____ ____ a. m. ____ p.m. on ____ 20 ____

Action taken to abate the violation: ____

Company / Operator Agent Served: Dwayne Pinson

Authorized Representative: Kendall Smith Kendall R Smith II Inspector No. 141

REVIEW: In accordance with Section 22A-1 -1 7 of the Code, an operator or any representative of the miners may apply to the Director of the Office of Miners' Health, Safety and Training for review of this notice of violation within thirty (30) days from the issued date.

NOTICE OF VIOLATION

Company / Operator Performance Coal Co. Inc Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 7/ 26 ,20 10 Time 2:00 ____ A.M. X P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2 , Section 40(26) and/or West Virginia Administrative Regulation:. Title ____ , Series ____ , Section ____ exists as follows: The 5 KVA 480/120 volt power center serial # 20112-5-104 and connected circuits are not properly maintained and installed. Three of the 20 amp 120 volt circuit breakers have the control handles broken off. Additionally the circuit breakers do not provide adequate protection for the connected circuits. All of the 20 amp 120 volt circuit breakers need to be changed to 15 amp circuit breakers to properly protect the # 14 AWG connected circuits and the 15 amp GFCI receptacles. This is a small power center used to supply power to the first set of airlock doors on the Mains travel way (track entry).

NOTICE OF VIOLATION

Company / Operator Performance Coal Co. Inc Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue 8/2 ,20 10 Time 11:30 X A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 40(20)(73) and/or West Virginia Administrative Regulation:, Title ____, Series ____, Section ____ exists as follows: The 480 volt P 40 CSE-2 Stancore dewatering pump located at the 29 crosscut on the Ellis belts is not properly maintained. The grounding conductors (2) are not properly connected in the control box. Both grounding conductors are connected to the same grounding lug. This is an improper connection due to the failsafe ground monitor not detecting a broken ground if the lug is detached from the control box. In addition the control box lid is damaged and in need of replacement due to holes and cracks. This is a portable dewatering pump.

Type of Issuance: N.O.V. X Order ____

Date of Issue 9-21 ,20 10 Time 1:30 ___ A.M. X P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A, Article 2, Section 40 (20) and/or West Virginia Administrative Regulation: Title ___, Series ___, Section ___ exists as follows: The 4160 volt Pump Labeled 19 Belt Pump is not being maintained in an approved condition in that the Pump Starter Box is not compatible with the Pump Also the #10 cable is not protected against Short Circuits Because the length of the Cable cannot be protected with the 4160 volt Recorp Breaker with a trip unit of 150-400 amps. The Maximum allowable setting shall NOT Exceed 70 Amps

Type of Issuance: N.O.V. X Order ___

Area or equipment (if order is issued): ___

The foregoing violation shall be totally abated by 8:00 X a.m. ___ p.m. on 9-28 20 10

The foregoing violation was totally abated by ___ ___ a.m. ___ p.m. on ___ 20 ___

Action taken to abate the violation: ___

Company / Operator Agent Served: Patrick Lemmons

Authorized Representative: Raymond M Cox Inspector No. 257

REVIEW: In accordance with Section 22A-1-17 of the Code, an operator or any representative of the miners may apply to the Director of the Office of Miners' Health, Safety and Training for review of this notice of violation within thirty (30) days from the issued date.

VIOLATION ASSESSMENT EVALUATION

NOTICE OF VIOLATION

Company / Operator Performance Coal Co., INC. Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name UBB Montcoal Eagle

Date of Issue April 27, 20 11 Time 11 X A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter 22A Article 2, Section 1 40(15) and/or West Virginia Administrative Regulation:, Title ____, Series ____, Section ____ exists as follows:

On the 22 Headgate Section, the # 2 Joy CM, Serial # JM5811, is not being maintained in a permissible manner in that the following conditions exist:

[1] The conduit for the left cutter motor has a split in it for a distance of three (3) inches.

[2] The left cutter motor power cable jacket does not extend through the entrance gland into the junction box.

[3] The trailing cable outer jacket is pulled out of the entrance gland at the junction box and the metallic shielding is not grounded in the junction box.

[4] The Main disconnect Enclosure has an opening in excess of .005 inch for a distance of four (4) inches.

[5] The cable entrance gland on the Main Disconnect Enclosure does not have a seal wire or other device to prevent loosening.

These conditions were observed on 11/8/2010

Type of Issuance: N.O.V. X Order ____

Area or equipment (if order is issued): ____

The foregoing violation shall be totally abated by ____ ____ a. m. ____ p.m. on ____ 20____

The foregoing violation was totally abated by ____ ____ ____ p.m. on ____ 20____

Action taken to abate the violation: This equipment is out of service. Repairs must be completed and the WVOMHS&T notified prior to placing this equipment back in service..

Company / Operator Agent Served: Paul Thompson

Authorized Representative: Raymond M. Cox Kenneth R. Smith John P. Scott Inspector No. 257

REVIEW: In accordance with Section 22A-1 -1 7 of the Code, an operator or any representative of the miners may apply to the Director of the Office of Miners' Health, Safety and Training for review of this notice of violation within thirty (30) days from the issued date.

NOTICE OF VIOLATION

Company / Operator Performance Coal Co., INC Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name Upper Big Branch

Date of Issue 4/27 ,20 11 Time 11:00 X A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter ____ Article ____, Section ____ and/or West Virginia Administrative Regulation:. Title 36 , Series 12 , Section 4.26 exists as follows:

The No. 13283, 995vac, Stamler Feeder located at spad #24577 on the No. 22 Tail Gate Section was found not being properly protected when inspected in that the 16/3 awg cable being used to supply power to the lighting circuit of this feeder was found being protected by one 5 amp fuse and one 30 amp fuse when both should have been 10 amp fuses to properly protect this circuit. Inspection was made at 9:05 am 9-24-2010.

Type of Issuance: N.O.V. X Order ____

Area or equipment (if order is issued): ____

The foregoing violation shall be totally abated by ____ ____ a. m. ____ p.m. on ____ 20____

The foregoing violation was totally abated by ____ ____ ____ p.m. on ____ 20____

Action taken to abate the violation: This equipment is out of service. Repairs must be completed and the WVOMHS&T notified prior to placing this equipment back in service.

Company / Operator Agent Served: Paul Thompson

Authorized Representative: Steven G Stanley Inspector No. 259

REVIEW: In accordance with Section 22A-1 -1 7 of the Code, an operator or any representative of the miners may apply to the Director of the Office of Miners' Health, Safety and Training for review of this notice of violation within thirty (30) days from the issued date.

NOTICE OF VIOLATION

Company / Operator Performance Coal Co., INC Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name Upper Big Branch

Date of Issue 4/27 20 11 Time 11:00 X A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter ____ Article ____, Section ____ and/or West Virginia Administrative Regulation:. Title 36 , Series 12 , Section 4.26 exists as follows:

The 1400 kva, AEEI, power center serial No. 27201-1400-1008, located at spad # 24357 on the North Mains Belt Construction Area was found not being properly protected when inspected in that. [a] The # 1 circuit 995 vac, 400 amp, 2000- 4000 inst-trip breaker was found to be set on 2750 inst-trip which is of too high an amperage for the 3/0 awg miner cable that it was being used to protect. A setting of 2000 inst-trip should have been used. [b] The circuit #4, 225 amp, 300-700 inst-trip, 480 vac breaker was found to be of the incorrect size to properly protect the 10/5 awg #137 brk pump cable it was serving. A inst-trip setting of 150 inst-trip was needed to properly protect this circuit. [c] The #7, 480 vac, 225 amp, 300-700 inst-trip, breaker was found to be of the incorrect size to properly protect the 10/5 awg Tail Pump cable it was serving. A inst-trip setting of 150 inst-trip is needed to properly protect this circuit. Inspection was made at 12:15 pm 10-5-2010.

NOTICE OF VIOLATION

Company / Operator Performance Coal Co., INC Contractor: Yes ____ No X

Permit Number U-3042-92 Mine Name Upper Big Branch

Date of Issue 4/27 ,20 11 Time 11:00 X A.M. ____ P.M.

Notice is hereby given that the undersigned authorized representative of the Director of the Office of Miners' Health, Safety and Training, upon making an inspection of this mine finds that the violation referred to in West Virginia Code, Chapter ____ Article ____, Section ____ and/or West Virginia Administrative Regulation:. Title 36 , Series 12 , Section 4.15 exists as follows:

The JM46570, 1212CM, 995 vac, Miner located one brk out by spad #20417, on the North Mains Belt Construction Area, was found not being maintained in a permissible condition when inspected in that [a] One protective flat washer was found missing from one of the 3/8 inch bolts being used to secure the aluminum cover of the operator side, pump end , MCI junction box [b] The cutter breaker was found to be set on an improperly high setting of 1750 inst-trip when a setting of 1275 inst-trip should have been used. [c] Four of the 1/2 inch bolts being used to secure the cover of the cutter breaker enclosure were found to be 1/2 inch shorter than the others being used. [d] An improperly made splice was found in the remote umbilical cord for this miner. [e] The right side ripper motor used entrance gland was found to not to be secured with wire or other device. [f] One of the 1/2 inch bolts being used to secure the cover of the master control enclosure was found to be 1/4 inch shorter than others being used. [g] The 3/0 AWG trailing cable was found to be pulled out of the entrance packing gland of the trailing cable junction box. Inspection was made at 12:30 pm 10-7-2010.

Type of Issuance: N.O.V. X Order ____

Area or equipment (if order is issued): ____

The foregoing violation shall be totally abated by ____ ____ a. m. ____ p.m. on ____ 20____

The foregoing violation was totally abated by ____ ____ ____ p.m. on ____ 20____

Action taken to abate the violation: This equipment is out of service. Repairs must be completed and the WVOMHS&T notified prior to placing this equipment back in service.
