

NAME _____ MINING PATIENT ASSESSMENT – TRAUMA

SCENE SIZE UP			
Takes, or verbalizes body substance isolation precautions		1	
Determines the scene is safe		1	
Determines the mechanism of injury		1	
Determines the number of patients		1	
Request additional help if necessary		1	
Considers stabilization of spine		1	
PRIMARY ASSESSMENT			
Verbalizes general impression of patient		1	
Determines responsiveness		1	
Perform rapid scan of:			
Airway	Opens and assesses airway	1	
	Inserts adjunct as indicated	1	
Breathing	Assess adequate breathing	1	
	Initiate appropriate oxygen therapy	1	
	Manage any injury which may compromise breathing	1	
Circulation	Assess Pulse	1	
	Check for life threatening bleeding	1	
	Assesses skin (color, temperature and condition)	1	
Make transport decision (Will patient need to be transported)		1	
SECONDARY ASSESSMENT			
Full-Body Assessment			
Assesses the head	Inspects and palpates the head	1	
Assesses the neck	Inspects and palpates the neck	1	
Assesses the chest	Inspects and palpates the chest	1	
Assesses the abdomen/pelvis	Inspects and palpates the abdomen	1	
	Inspects and palpates the pelvis	1	
Assesses Extremities	1 point for each extremity	4	
Verbalize Vital Signs (Obtain Base Line Vitals Blood Pressure, Pulse, Respirations)		1	
Manages secondary injuries and wounds appropriately		1	
1 point for appropriate management of the secondary injury/wound			
HISTORY TAKING			
Obtains S.A.M.P.L.E. history		1	
REASSESSMENT			
Repeat Primary Assessment		1	
Reassess Vital Signs		1	
Reassess Chief Complaint		1	
Recheck effectiveness of treatment		1	
Identify changes in patients condition		1	
	Reassess Patient:		
	Stable Patient every 15 minutes		
	Unstable Patient every 5 minutes		
TOTAL POINTS		34	

Critical Criteria: Failure to complete more than one of the following will result in failing this skill station

- _____ Did not take, or verbalize, body substance isolation precautions when necessary
- _____ Did not assess for spinal protection
- _____ Did not provide for spinal protection when indicated
- _____ Did not evaluate and find conditions of airway, breathing and circulation
- _____ Did not manage/provide airway, breathing, hemorrhage control or treatment for shock
