

CPR, AED, and Choking Skills Demonstration Videos

Videos devoted to showing proper CPR skills support the course and minimize the need for lectures. All of the CPR, AED, and Choking Care Skills listed below have an associated video segment showing how to perform the skill. Some of the skills also have an associated Skill Sheet and/or Flowchart (as denoted), which have been provided for convenience in your teaching package. These are optional to use during class and may also be found in the student manual.

If you are following a lecture format for your course, you may choose to use the lecture presentations that included these embedded skills demonstration videos.

CPR, AED, and Choking Care

Placing a Person in the Recovery Position (Skill Sheet 6-1)

Adult and Child CPR (Skill Sheet 6-2, Flowchart 6-1)
