# SAFETY RECOGNITIONS AND AWARDS

## **Mountaineer Guardian History**

The West Virginia Office of Miners' Health, Safety and Training and the West Virginia Coal Association (Mining and Reclamation Association) established the Mountaineer Guardian Safety Awards Program in 1983 as a joint effort to promote safety in the coal fields of West Virginia. This special program gives recognition to mining workplaces where employees have accumulated qualifying amounts of production without experiencing a fatal accident. Mining Operations are divided into categories, based on the number of employees.

In 1977, the Mountaineer Guardian Safety program was extensively revised. The most important change was to include the West Virginia Office of Miners' Health, Safety and Training inspection personnel in the selection process. Each inspector may nominate mines/facilities for consideration. Representatives of the sponsoring agencies review those regional nominations and selections for the awards are made from that list.

Selection Criteria:

- Mine/facility must be fatal free for the award period
- Safety Program (initiatives by the company)
- Co-operative efforts (company works with inspectors – abates violations – good faith)
- Violation History

Beginning with the 2008 program, two mining operations are singled out for each year for special recognition, and receive the **Milestones of Safety Awards**.

The 2017 Mountaineer Guardian Awards were presented on January 30, 2018 at the 45<sup>th</sup> Annual West Virginia Mining Symposium which is sponsored by the West Virginia Coal Association at the Charleston Civic Center.

## **TERMS AND DEFINITIONS**

### **NUMBER OF MINES**

The WV Office of Miners' Health Safety and Training issues monthly and annual figures regarding the number of mines in West Virginia. The annual figure represents the total number of surface and deep mines which held valid permits during the year. Monthly figures reflect the total number of surface and deep mines with open permits (have not been permanently closed) during a month.

### **NUMBER OF COMPANIES**

This figure represents the total number of mining companies with valid permits. This does not include sub-contractors or affiliated companies. For example: Mark Coal Company may have 6 permits in its own name and another 10 permits listed in various contractors names. In the statistics collected by Miners' Health Safety and Training, Mark would be counted as one company, and the contractors as 10 other companies.

### **NUMBER OF TONS MINED, TONNAGE OR PRODUCTION**

All relate to the same thing, i.e. the amount of mineral resource extracted in the mining process. The monthly production report represents "the actual raw tonnage mined." (Code section revised 1994)

### **DELINQUENT TONNAGE**

This is tonnage reported to Health Safety and Training late, in violation of 22A-2-77 of the WV mining laws.

### **DISTRIBUTION OF TONNAGE**

This figure represents the method of shipment of coal from the mine. The reported distribution does not need to agree with reported tonnage figures, because coal may be stockpiled and shipped months after it was produced.

### **ACCIDENT**

The term accident shall mean any mine explosion, mine ignition, mine fire, or mine inundation, or injury to, or death of any person." [West Virginia Mining Laws 22A-1A-1]

The following terms relate to accidents involving injuries:

- 1) Fatal Accident. An on-the-job accident resulting in death to the victim.
- 2) Non-fatal Accident. An on-the-job accident which does not result in death to the victim. There are two classifications of non-fatal accidents:
  - a) Non-fatal Lost-time Accident -An injury which results in the injured person missing their next scheduled work shift.
  - b) No Lost-time Non-fatal Accident - The injured person remains on the job or reports for his or her next scheduled work shift.

### **NUMBER OF DAYS MINE OPERATED, or NUMBER OF DAYS WORKED**

This figure indicates the number of days in the calendar month or year that the mine actually produced coal.

**TOTAL NUMBER OF EMPLOYEE HOURS**

This figure is the total number of hours worked by all employees on the bonded area of a permit.

**AVERAGE NUMBER OF DAYS WORKED**

This figure is the total number of days worked divided by the number of reports received showing days worked.

**NUMBER OF EMPLOYEE DAYS WORKED**

This figure is the total number of employee hours divided by 7.9 for underground miners, or 7.25 for surface miners. The average work day length is based on the UMWA-BCOA contract. For the Annual report, this figure is calculated for each mine; the mine totals are summed for county totals.

**NUMBER OF TONS MINED PER DAY**

This figure is the total tons produced divided by the total number of days worked. This is calculated for each mine, then summed for county totals.

**AVERAGE DAYS PER EMPLOYEE**

This figure is calculated for each company by dividing the total employee days worked by the total number of employees.

**NUMBER OF TONS MINED PER EMPLOYEE PER DAY**

This figure is calculated for each county by dividing the total number of tons mined per day by the total number of employees.

**NUMBER OF TONS MINED PER EMPLOYEE PER YEAR**

This figure is calculated for each county by dividing the total production by the total number of employees.

**NUMBER OF EMPLOYEES**

All mines are required to report employment figures monthly. This total includes all personnel on the bonded area of the permit. From these figures, the Office of Miners' Health & Safety prepares monthly and yearly statistics. The monthly figure is simply the total number of reported employees for a given month.

The yearly figure is the average number of reported employees for the year. The average is based on the number of months the mine had reported employment. For the Annual Report, the average number of employees per mine is totaled for each county, and subsequently for the State.

Annual Report figures are higher than the monthly figures because the annual figures include employment at mines which were idle during the year and mines which permanently closed. For example, a mine may have reported twelve employees in January, and either permanently or temporarily closed for the rest of the year. The average annual employment for that mine would be shown as twelve.

Comparisons of employment statistics should take into account the various methods and requirements concerning the collection of such statistics. In past years, certain

employment figures were estimated rather than calculated, (1919 Annual Report). Also, for some years, various types of mines were exempt from the reporting requirements.

The historical differences in mine employment data compiled by the WV Office of Miners' Health Safety, and Training and that compiled by the Division of Employment Security figures can be attributed to reporting requirements. Employment Security figures represent more of an "industry" total while the Miners' Health, Safety & Training's statistics are primarily production-related. Under current mining laws, a mine is required to report only those employees working at the mine site. Employees other than those at the mine site are not required to be reported to the Miners' Health, Safety & Training; for example, mine companies with central shops, offices, and other facilities not located on a mine permit, would not include those employees in reports to the Miners' Health, Safety & Training. Another example would be tipples or prep plants or other coal handling facilities not associated directly with a mine site. At present, there are no laws requiring employees at these facilities to be reported to the Office of Miners' Health and Safety.

#### **NUMBER OF TONS MINED PER INJURY**

This is calculated for both deep and surface mines and for fatal and non-fatal injuries. The formula is the total number of tons mined divided by the total number of injuries.

#### **ACCIDENT FREQUENCY RATES**

This is calculated for both deep and surface mines for fatal and non-fatal injuries. The formula is injuries multiplied by two hundred thousand, divided by the total number of employee hours.

#### **MINER CERTIFICATION**

This is a license issued to individual miners to perform various tasks at a mine site.
